SikBao

Sprint 1 Report

Team Name: SikBao
4/24/2018

Product Owner: David Trang
Scrum Master: Kenji Mah
Developers: Brian Yee, Kiran Gurung, Michael Lee

Actions to stop doing:
There are no current actions that need to be halted because meetings are being attended frequently. Meetings show no sign of decreased productivity. Even though there are no actions that should be halted, there is still a lot of room for improvement.

Actions to start doing:
Team communication through discord and trello(scrum board) needs to be improved. Small actions such as checking discord more frequently or even communicating any concerns should be improved upon to increase productivity. The scrum board also needs to be checked and updated more often so that people know what tasks they have.

Actions to keep doing: Scrum meetings so far have perfect attendance and are constrained within the 15 minute range. Communication via text is very good and should still be kept for issues that need immediate responses.

Work completed/not completed:
Completed:
   ● Everyone is relatively comfortable with the new technologies (react, firebase, css, html)
Not completed
   ● We need to still design a UI layout and produce something that is deployable.

Work completion rate:
Total number of user stories completed during the prior sprint = 0 stories
Total number of estimated ideal work hours completed during the prior sprint = 5 hours/ week
Total number of days during the prior sprint = 14 days

Due to time committed to learning technologies, none of the stories were completed. There should have been a story for discussing developer learning the technologies. However for this, there was an ideal of 1-2 hours/day on MWF.
